Assessment**

# Next Generation Asset Management

Combine industry-leading oblique aerial imagery with the power of AI to solve asset management challenges.

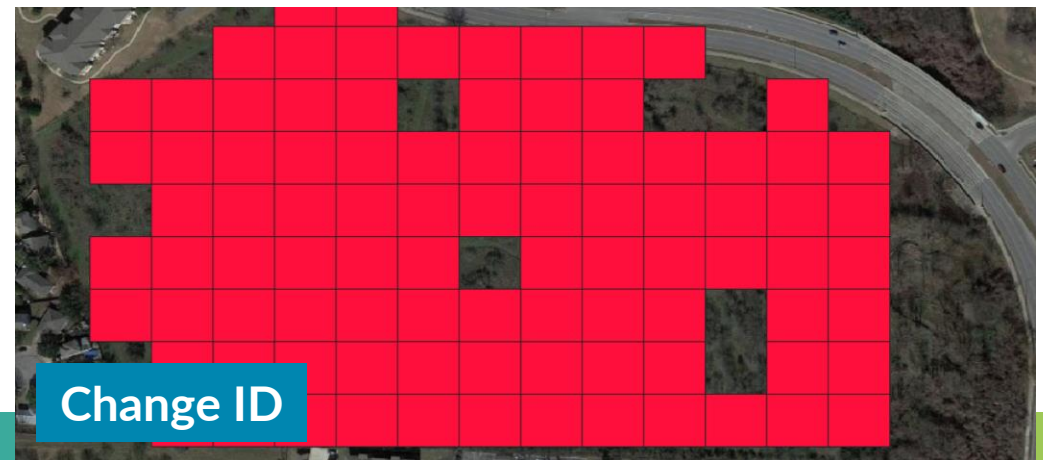

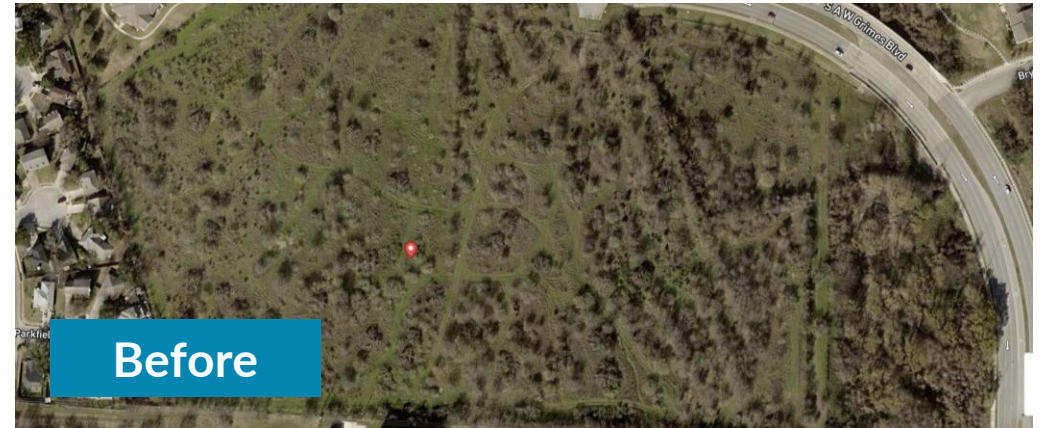

# Illegal Dumping Site Identification

- Problem: Governments struggling to detect and take action on illegal dumping sites. Desire for automated solution to scan large areas.
- PoC: Small area in southern California

# Land Use Change

- Problem:
  - Governments not informed by land owners of changes in land use in a timely manner.
  - Need - identify land use change and adjust assessed value (including retroactive changes)
- PoC:
  - Central Texas
  - Identify agricultural parcels with evidence of commercial or residential use

Thank you!
